

Enabling Business through Technology

Customized IT solutions specific to your business needs & industry challenges

As an engineering led firm, the JDL team leans on our years of experience to develop best of class IT solutions that address the true pains of our customers. Based in Fort Lauderdale, Florida, our portfolio of technology solutions includes virtualization, managed services, wired and wireless network design and implementation services, and converged infrastructure configuration and deployment. With a team of highly skilled engineers, JDL works with the newest and advanced information technology to implement effective business solutions specifically catered to each business' needs.

Over the past 15 years, JDL Technologies has provided scalable and effective IT planning, implementation, and support services for organizations, enterprises, and educational institutions across the nation. Our strategy has been to develop unique IT solutions for each client to address their specific needs while providing cost reduction, increased revenue generation, ease of use, greater availability and secure IT resources.

In order to provide solutions that are tailored to fit each client's distinct IT environments and vendor preferences, we have established strategic partnerships with a variety of global leaders and technology innovators allowing us to offer vendor agnostic solutions. Some of our technology partners include:

JDL Enables your IT with these results:

- Reduced costs with increased efficiency, productivity & performance
- Heightened workplace flexibility & agility
- Enhanced end user experience
- Upgraded level of availability & security
- Improved disaster recovery & business continuity

Information technology is constantly evolving with new solutions and methodologies being developed faster than most companies can keep up. We make it our mission to stay current with these changes. Through your relationship with us, you can be sure that your organization can rely on our experience to help you determine if and when your organization should adopt new technologies based on your own unique business goals.

Allow JDL to leverage our expertise, ensuring that you get the most out of your IT investments.

A Leader in Customized IT Solutions

Guiding your business through new technologies

Our expertise is in creating solutions that best suit your IT within these core competencies

Virtualization: Be it server, desktop or application, our virtualization solutions provide your business with:

- Reduced costs with increased performance
- Heightened workplace flexibility & agility
- Magnified adaptation to business change
- Upgraded levels of security & disaster recovery protection

By leveraging industry knowledge and strategic partnerships with Citrix, VMware and Microsoft, you can access any workload, anytime, anywhere, and on any device.

Managed Services: Having our experienced engineers complement your existing IT staff by taking on the daily management and availability assurance of your infrastructure frees your team to focus on the projects that are critical to the growth of your organization. Our suite of managed services includes:

- Patch & Asset Management
- Automation
- Availability Assurance
- IT Help Desk
- Event Alerting
- Remote & On-site Support
- Endpoint Security
- Desktop Migration

Network Services: Having designed, deployed and managed one of the largest wireless infrastructures in the country, our engineers can advise your business on the design and implementation of your corporate network from wired to wireless and beyond. Through our relationships with partners such as HP, Cisco Systems, Ruckus Wireless, Meru Networks and others, JDL aligns with your business needs to optimize your IT landscape.

Converged Infrastructure: More than ever before, businesses grow and gain competitive advantage by speeding up IT innovation and responsiveness. Through JDL's converged infrastructure practice, your business will experience:

- Accelerated ROI & sustainability
- Reduced costs by combining infrastructure
- Enhanced security & disaster recovery

At JDL, we work with our clients to develop unique IT solutions that address their specific business and IT requirements. Our team will seamlessly integrate into your business model, becoming a trusted advisor and virtual extension of your team.

Let JDL Enable your IT!

A Leader in Customized IT Solutions for over 15 years. JDL's portfolio of IT Services includes:

- Virtualization
- Managed Services
